

Tips

[Updated: May 14, 2026]

This page summarizes tips regarding SAKURA AI Engine.

Configuring a service endpoint gateway

1. [Refer to the Service Endpoint Gateway Control Panel Operation Guide to enable the Service Endpoint Gateway for your switch.](#)
2. Confirm that the activation status is "Available" and click "Edit" at the bottom right of the screen.
3. Check the box for `api.ai.sakura.ad.jp` under "SAKURA AI Engine".
4. After confirming the entered information, click "Change" at the bottom right.

Service Endpoint Gateway
