

SAKURA AI Engine

[Updated: June 10, 2026]

SAKURA AI Engine is a pay-as-you-go platform service that provides access to a wide variety of Generative AI models.

Since all supported LLMs are hosted entirely by SAKURA internet, all data traffic remains strictly between the customer and SAKURA internet. Furthermore, data inputted into chats and other interactions is never used for LLM training, ensuring an exceptionally secure and private service.
